

## 2-Year Extended Warranty

**Only AEGIS® Stands Behind Its Shaft Grounding Technology with a Free 2-Year Extended Warranty Against Bearing Fluting Damage**

Here's how to take advantage of the warranty

- 1** Protect any motor (with new bearings) with an AEGIS® Ring — installed according to AEGIS® Best Practices for Bearing Protection
  - Purchase a new motor with an AEGIS® Ring factory-installed; or
  - Retrofit an AEGIS® Ring on an existing motor according to AEGIS® Best Practices
- 2** Complete the registration form on the AEGIS website:  
[www.est-aegis.com/warranty](http://www.est-aegis.com/warranty)
- 3** Rest easy knowing that your motor is protected against bearing fluting for a period of 2 years (beyond the motor manufacturer's warranty)!

## AEGIS® 2-Year Extended Warranty

Electro Static Technology (EST, AEGIS®) guarantees that AC induction motor bearings will not fail from electrical fluting damage when AEGIS® Shaft Grounding Rings have been installed with new bearings in accordance with EST's recommended best practices, as published in the AEGIS® Bearing Protection Handbook (current edition).

- a. The AC induction motor must meet the conditions listed below and new bearings must be installed at the time of AEGIS® Ring installation for the warranty to be approved.
- b. For repaired motors or for field installations: Upon registration and approval, the warranty shall be for 2 years from the installation date of the new motor bearings and AEGIS® Ring.
- c. For new motors with AEGIS® rings installed by the motor manufacturer: Upon registration, the warranty shall be for a 2 year period after the motor manufacturer's bearing warranty ends.
- d. If electrically induced bearing fluting damage occurs, EST will pay the current Vaughan's National Average Price for "Furnish/Install 2 Standard Ball Bearings" and will supply a new shaft grounding ring (SGR or PRO as appropriate) and AEGIS® Colloidal Silver (CS015). The warranty shall apply to any AC induction motor — whether new or repaired — which conforms to AEGIS® Bearing Protection Handbook best practices.

## Terms and Conditions

1. For All Motors: New bearings MUST be installed at the time of AEGIS® Ring installation.
2. All Motors: For this warranty to be valid, the owner must register the motor within 30 days of purchase by filling out the form at [est-aegis.com/warranty](http://est-aegis.com/warranty).
3. For AC Induction motors up to 100 HP: The warranty shall apply when AEGIS® Rings have been installed on the motor per AEGIS® Bearing Protection Handbook best practices.
4. AC Induction motors greater than 100 HP: The warranty shall apply when AEGIS® Rings and insulated bearings/insulation have been installed on the motor per AEGIS® Bearing Protection Handbook best practices.
5. AC Induction motors greater than 500 HP and all motors with supply voltage greater than 600 VAC (medium/high voltage): The warranty shall only apply when AEGIS® PRO Series Rings and insulated bearings/insulation have been installed on the motor per AEGIS® Bearing Protection Handbook best practices.
6. The best practices shall apply per the current edition of the AEGIS® Bearing Protection Handbook at the time of installation.
7. Selection of the applicable ring (AEGIS® SGR or PRO Series) must conform to the requirements in the AEGIS® Bearing Protection Handbook.
8. The owner of the motor must verify that the installation of AEGIS® Rings and bearing insulation (if applicable) was performed according to AEGIS® Bearing Protection Handbook best practices in order to receive approval for the warranty.
9. EST shall retain the sole authority to issue and approve the warranty for any application.
10. The warranty shall be activated and conferred to the motor owner upon the issuance by EST of an email or certificate confirming warranty acceptance.
11. All warranty applications shall be made by filling in the form.
